

XM26 12 Gauge Modular Accessory Shotgun System (MASS)

XM26, a 12 Gauge Modular Accessory Shotgun System (MASS), is under development and intended to attach underneath the M4 Modular Weapon Systems (MWS). It zeroes to the host weapon and fires lethal, non-lethal, and door breaching rounds.

XM26 also is designed as a stand-alone system and comes with a collapsible buttstock. With a Picatinny rail on top, the receiver can be used to mount sighting equipment.

The bolt handle is mountable on either side for ambidextrous handling.

Performance Characteristics

- Attaches underneath the M4
- Fires lethal and non-lethal rounds
- Stand-alone system
- Ambidextrous
